Highly motivated Computer Science graduate with hands-on experience in cloud infrastructure, system configuration, and technical support. Strong communication skills, collaboration, and time management.

WORK EXPERIENCE

IT Infrastructure Engineer Intern

Stericycle

Bannockburn, IL

June 2024 - August 2024

- AWS Management Console: Technical support resolving AWS Workspaces tickets for user account issues
- VMWare Cloud Director: Managed and optimized multi-cloud infrastructure, including server creation, cloning, and configuration, ensuring strong and scalable environments.
- vSphere Client: Monitored server performance, accessed VM servers remotely, conducted regular backups, and provided cloud infrastructure support and troubleshooting
- Contributed to IT operations during the \$7.2 billion acquisition. Created, cloned, and configured cloud servers with compliance with security protocols and lab requirements.
- AWS Server Migration Project: Oversaw migration of cloud servers from Lumen to AWS cloud, ensuring seamless and minimal downtime, and supported cloud-based application and database development operations

Technology Configurator Intern

CDW

Vernon Hills, IL

Nov 2022 - Jan 2023

- Installed and configured large scale software and hardware components
- Configured and quality control customer tech systems: Arizona State University, Chipotle, Nationwide high schools
- Verify component compatibility and release orders, maintain daily & monthly productivity target goals

Project Manager / Tile Installer

Unique Walls and Floors Construction

Greater Chicago Area

2015 - 2025

- Perfected intricate flooring and wall designs & maintained a high level of performance and deadlines
- Project managing tasks and teams by implementing new team strategies to enhance efficiency in a fast-paced on-site environment

PROJECTS

AWS Resume Website | Personal Project

- Designed and deployed a static resume website using Amazon S3 for hosting, with CloudFront for global content delivery and HTTPS security
- Implemented a dynamic contact form using API Gateway, Lambda, and SES for email processing. Used AWS CLI for file synchronization and cache invalidation, ensuring rapid and seamless content updates

EDUCATION

Lewis University | Bachelor of Science | Computer Science | GPA 3.71/4.0

Dec 2024

College of DuPage | Associate of Applied Science | Software Development

May 2023

Coursework: Java, SQL, Python, HTML, CSS, XML, Linux, Unix, Databases, Microsoft Suite 365, Windows, Adobe, Systems Analysis

SKILLS

AWS Management Console, VMWare Cloud Director, vSphere Client, Tickets, Active Directory, Troubleshooting, Virtual Machines, SQL Server Management Studio, Cloud & Server Configuration.

Certificates: Microsoft 365 Access Expert 2023
